**DETAILED ACTION**

1. The Amendment Declaration and Petition for Time Extension filed by Applicants on 03/26/03 and Amendment filed by Applicants on 04/22/03 have been entered.

***Response to Amendment/Arguments***

2. Applicant's amendment and arguments filed on 04/22/03 have been fully considered and they are found persuasive.

3. The rejection of claims 10-20 under 35 U.S.C. 102(b) as being anticipated by Cope, EP 0 807 510 A1 (hereinafter "Cope") is withdrawn.

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 1713

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

6. Claims 10-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cope. Cope teaches a process for preparing an extrudable composite comprising a PVC polymer resin, cellulose, a stabilizer, a lubricant, wood flour and process aids. See Cope, page 2, line 19 through page 5, line 51. The present invention differs from Cope in that the Example found in Cope do not teach the high amounts (24 to 65 wt. %) of cellulosic material (wood filler). Cope teaches in the full disclosure volume ration of wood filler:resin of 15:100 to 140:100. See Cope page 2, line 54. In view of the full disclosure, one having an ordinary skill in the art would be motivated to modify the examples by using large amounts of wood filler. Such modification would be obvious because one would expect that the use of the resin/wood filler blend compositions as taught by the

Art Unit: 1713

examples would be similarly useful and applicable to the larger amounts of wood filler taught in full disclosure.

**Conclusion**

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert D. Harlan whose telephone number is (703) 306-5926. The examiner can normally be reached on Mon-Fri, 10 AM - 8 PM.
